Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-43 are rejected under 35 U.S.C. 102(e) as being anticipated by Pastyr et al. (US 2004/0143905).

Pastyr discloses a patient gurney comprising a chassis (see Fig. 2),

Art Unit: 3673

a support component on said chassis, said support component having a positive fit mechanism having a contact surface (this is considered as the cut out section below where member 1 is pointing in Fig. 2 and where member 5 and 37 are pointing in Fig. 2), said support component to said positive fit mechanism (this is considered to be the interference fit between the desired board and the contact surface which is considered as the cut out section below where member 1 is pointing in Fig. 2 and where member 5 and 37 are pointing in Fig. 2) being releasable to allow removal of said patient support board, said support component exhibiting multiple configurations of said contact surface (this is considered as the cut out section below where member 1 is pointing in Fig. 2 and where member 5 and 37 are pointing in Fig. 2). It should be noted that applicant's figures 5 and 6 show members 59 and 47 as constituting a support component exhibiting multiple configurations. In the same manner, Pastyr Figure 2 show members 5,37 and cut out section below where member 1 is pointing in Fig. 2 as constituting a support component exhibiting multiple configurations.

Response to Arguments

3. Applicant's arguments filed 12/9/05 have been fully considered but they are not persuasive. Applicant argues that Pastry does not show a support component exhibiting multiple configurations. The examiner disagrees. In as much applicant's figures 5 and 6 show members 59 and 47 as constituting a support component exhibiting multiple configurations then Pastyr Figure 2 show members 5,37 and cut out section below where member 1 is pointing in Fig. 2 as constituting a support component exhibiting multiple configurations as well.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
